## Projects

### Airline Reservation System

Academic Project B.Sc. final year and Went live on June 2011

Description	The airline reservation System books tickets for customers and give them a confirmation ticket. This system also provide Reservation, Cancellation, Help options for customer and Reservation report, Cancellation report options for airline agent. This system stores Customer information, Registration information and Flight information into database.
Platform	Java
Database	Ms-Access

### Online Exam System.

Academic project of MCA Sem-V

Description	This system is very much helpful to students, Examination department and exam controller. It stores the information about administrator, students, exams, report, results, Student's details. The administrator of the program makes the question bank for each examination. The applicants can sign in through the client computers with their register number given to them and can take the examination. The questions will be display randomly from question bank. Objective answers will be checked automatically by the system from the database. A timer will monitor enough some time to after enough time period the system itself display the result. If it is before time, applicants click on finish button then result is display on screen
Platform	ASP.NET.
Database	SQL Server.
Web Technologies	HTML, CSS, Jscript.

### Online Auction System.

Academic project of MCA Sem-VI

Description	"Dream Auction" is an online auction web site aimed at taking the auction to the finger tips of aspiring bidders there by opening up the doors of the "OPEN Auction House" to a wider cross section of Art Lovers and Antique Collectors. This site also acts as an open forum where buyers and sellers can come together and exchange their products. The site makes sure that the sellers get a fair deal and buyers get a genuine product.
Platform	ASP.NET.
Database	SQL Server.
Web Technologies	HTML, CSS, Jscript.
