CAREER OBJECTIVE:

To become an HVAC engineer while paving my foundational knowledge on grounds of logic, reasoning and environmental awareness. To work in the company of personnel where my skills contribute to the flourishing of both the organization and myself, alike.

ABOUT MY SELF:

"It always seems impossible until it's done"

From humble background.

Hardworking and innovative.

Work effectively in a team and as an individual.

Strong Fundamentalist.

Eager to learn and do not mind the extra mile, if required.

ACADEMIC HIGHLIGHTS:

Complying to my inclination to learn HVAC Engg. I have successfully completed a certification course on "HEATING VENTILATION AND AIR CONDITIONING" from DHANUSH ENGINEERING SERVICE PRIVATE LIMITED, Hyderabad.

Stilt+5 floors RESIDENTIAL BUILDING analysis while studying at DHANUSH ENGINEERING SERVICE PRIVATE LIMITED

INTERNSHIP:

As a response to my interest in Building construction technology and its correlation to the environment, I applied and was accepted as an intern at Deccan Cement Ltd., Nalgonda.

Key learning: Enhanced the knowledge regarding the various processes manufacturing cement and how it impacts the environment & safety policy of the company for its workers.

GRADUATION MAIN PROJECT:

Design, analysis & fabrication of a two seater compressed air-run car with safe braking.
