EXPERIENCE

- Perennial Systems , Pune** 14 November 2016 - Working
Senior Android Developer
Basically I involved right from architecture design then development and finally testing.

I have an experience of total 5 projects.Out of 5 projects couple of Fintech domain projects, one health care domain project, one real estate domain and one chat boat application.

I have worked on MVVM,MVP, clean and MVC architecture.

TECHNICAL SKILLS

- I have an experience of Java, Kotlin, restful api, JSON, android studio, Sqlite, java script and react native.

PROJECTS

- Mywallet** 8 months
Mywallet:
this was a fintech domain project on which I worked on.This is basically wallet application in which Singapore user who don't have bank account can create virtual wallet with virtual or physical card with main features of transfer, pay, receive, topup and load/ unload card.
In this project I was one senior developer.
- Fomopay** 4 months
Fomopay:
This was currency conversion application mainly operated in Singapore.
in this application I was one and only dev
- Outch** 10 months
Outch :
This was health care domain application.I was senior senior developer.with this application you can make appointment to the doctor by comparing doctors near you with rates and other parameters.You can see appointments upcoming and past. Also you can chat with doctor and also give feedback on

doctor queries. There was a scan QR code module involved to start appointment. You can basically place appointment for any country

- **Negobot (React Native)** 6 months

Negobot:

Chat bot application was developed in React Native technology. I was only developer.

This is basically a bot application for customer care staff. If support bot is unable to answer customer then staff can communicate with customer with this app

- **M2 Real Estate** 12 months

M2 Real Estate:

This was a real estate domain application. This application was used to make an auction. To calculate construction cost and to make an advertisement of land.

- **Big C and Mandalay Smart Wallet (kotlin)** 6 months

This is my current project on which I am working on. This is again a wallet app and online shopping application with features like topup, transfer, pay and history and coupon.

- **Washlab** 10 months

WASHLAB is an on demand laundry service company in the State of Kuwait.

WASHLAB is an on demand laundry service company in the State of Kuwait. WASHLAB provides premium pickup and delivery service for laundry & dry cleaning. We process your garments at state of the art central laundry facility. Our mission is simple, as we want to provide our customers with premium laundry service from your doorsteps to your doorsteps, wherever you are! You can pay either by cash on pickup or by debit card.

Our app is simple to use in 3 steps:

- 1- Select pickup and delivery time and date
- 2- Select your garments and address
- 3- Review your order and pay either upon pickup or online

That's it!

If you do not want to select your garments, no problem, just use the option "I want WASHLAB assist me" where WASHLAB will place your order upon pickup.

PERSONAL STRENGTHS

Positive thinking.

Analytical problem solving
