Technical Skills

- Backend - Java, J2EE, Spring Core, MVC, Boot, Micro services, Restful Services
- Application Server- Apache Tomcat
- Frontend – Angular JS, JavaScript, and HTML5 styled with CSS3
- Databases - My SQL, MongoDB
- Data Access – JPA, Hibernate
- IDE – Eclipse
- Build & Repo Tools - Postman, Robo-mongo, Git Hub, Maven
- CI/CD – AWS, Jenkins
- Unit Testing – Junit, Mockito

Work Experience

A] Software Developer

Advent Software Pvt. Ltd (Pune, India)

April 2017 - Present

1] Project Name -LogiksmsV1 (Web Application) | Nov 2019- Till Date

Client –Logik sms, France

Project Summary –

This is a web application where various business organizations can promote their newly launched products among target customers by sending email and sms from a list of customers. The system has different user level privileges like Admin, Organizational User. Organizational User can upload excel or csv file. Organizational User can create campaign (with specific criteria means filtering customer's records) that can be executed immediately or future date. After campaign execution email and sms will be sent to the customers. A BIRT report (i.e. the number of campaigns executed by an Organizational User) is generated per month for an Organizational User.

Responsibilities -

- Integrate sms sending API and writing code to send sms.
- Writing code to generate excel sheet based on the data from database.
- Writing code for sending mail (using JavaMail API).

Platform - Java 8, Spring Boot, Maven, Rest, JUnit, MySql.

2] Project Name – App-On (Web Application) | Dec 2018- Oct 2019

Client–Vinoba Bhawe University/ Kolhapur University

Project Summary –

This application is basically a portal site, build to solve the purpose of online student registration for an educational institute like university or college. The system has different user level privileges like General user, Institute Admin, Client Admin and Super Admin.

Responsibilities –

- Creating project from archetype (Custom) and set up all the basic functionality for the project.
- Writing code to generate excel sheet based on the data from database.
- Writing code for sending mail.
- Integrate Business Intelligence and Reporting Tools (BIRT) into the project and writing code to generate pdf using BIRT based on the data from database.
- Integrate sms sending API and writing code to send sms.
- Writing code for Authentication Interceptor to authenticate users.
- Implement Login (With database driven menu), Logout and Wizard screen.

Platform - Java 8, J2EE, Spring Boot, Maven, Micro services, AWS, MySQL.

3] Project Name – Home Savers | May 2018- Nov 2018

Client–California, USA

Project Summary –

Homesavershero.net was founded in California in the year 2009 to help the distressed home owners to process the loan mitigation. HomeSaversHero.net is a unique platform through which a home owner will get the home loan processed by a business center located in their city or of same state. This web based application will help home owners to get the updates of the current process of their repayment plans or loan modifications.

Responsibilities –

- Involved in developing confirmation mail system using Java Mail 1.4.
- Involved in developing pages using JSP and spring framework.
- Design and development of tables in My SQL database and creation of DAO classes.

Platform- Java 8, J2EE, Spring MVC, Maven, Unit, MySQL, Agile.

4] Project Name – SPL Fitness Web App | Oct 2017- May 2018

Client–SPL Fitness Nagpur

Project Summary –

This project is about providing solutions to business needs of the Gym/Club chain. Key Features include administrative task management, automated marketing and retention, flexible scheduling and integrated billing processes, reporting, member billing cycles and more. Also features a toolset for marketing management. Notifications and alerts can be set up for customers, targeted marketing campaigns can be launched and marketing reports can be generated and assessed.

Responsibilities –

- Conversion of functional requirement into technical using Agile.
- Application development, Unit Testing & Fixing defects.
- Overall co-ordination of technical issue, troubleshooting, integration, deployment, module rollout planning with functional team.

Platform - Java 7, J2EE, JSP, Servlets, JDBC, JavaScript, Rest, MySQL

5] Project Name – ODSS Mock Exam Portal | April 2017- Nov 2017

Client–ODSS Pvt Ltd Nagpur

Project Summary –

This project is about the sophisticated and customized Mock Examination Management software. It manages different examination types, Configure rules, which serves chiefly as practice for the future real-time competitive exams & on the basis of that various tests reports are generated.

Responsibilities –

- Conversion of functional requirement into technical using Agile.
