- Test management tools - **TestLink and Excel sheet**
- Familiar with databases- **MongoDB.**

EXPERIENCE SUMMARY:

- Having 4+ years of experience as a **QA Engineer.**
- Proficient in building custom automation frameworks using **Selenium, Webdriver** and **Appium** based on testing scenarios like web /mobile / both
- Experience in software Testing (Manual) and extensive experience in **Mobile and Web based applications and API Testing.**
- Exposure on all stages of **SDLC, STLC, Bug Life Cycle.**
- Exposure to **Agile (Scrum)Methodology.**
- Knowledge on Testing PWA App, Web Apps and API Testing.
- Perform load testing by using **JMeter.**

- Expertise in execution & Bug Reporting using **JIRA**.
- Ability to effectively **prioritize** tasks and **adhere to deadlines**.
- Sound experience working in a team-oriented and collaborative environment.

EXPERIENCE DETAILS:

QA Engineer Alphonso

Informex Pvt Ltd Client:

Rezoomex Duration: April

2016 to till date. Project:

Rezoomex

Project details:

Rezoomex is a product built to ease up the candidate hiring and shortlisting process for a vacancy by automating the tedious process of resume screening and processing.

Rezoomex is a Recruitment Engine which is built to shortlist and do an intelligent screening of candidates before the actual screening by the employer.

Rezoomex has built on following submodules

1. Ranker Application

- This is the main module which is used to upload resumes and create a job. Once a recruiter creates a job then they can upload multiple resumes against that job.
- This module also helps to find out a top ranked candidate so that the recruiter can send the quiz to only that candidate.
- Recruiters can also schedule Skype, Telephonic or face to face interviews of candidates using this module.

2. QuizApp Application

- This module helps to create a quiz for a candidate according to a job description.
- Recruiters can create a quiz for multiple technologies with a combination of coding and non coding questions.

- Recruiters can create multiple quizzes for the same job but only one quiz will be activated at a time for the job.

3. TechQuiz Application

- This application is PWA which opens up on mobile browsers.
- Candidate uses this application to attend the quiz. Recruiters and HR persons can view the candidate pool (score and Video) using a progressive web application and the same application is used for the first round of screening online quiz.

4. Tracker

- This module helps to save and display candidate details. It uses a “tracker” to find a suitable candidate for a vacancy within a few minutes.
- Tracker gives complete information about the candidate.

5. Paywatch

- Companies can check the pay scale in the market based on current software trends and candidate proficiency (experience).
- This can be viewed in “Paywatch” another useful software product developed by the Rezoomex team.

Roles and Responsibilities:

- Understanding the Requirements and Functional Specifications of the application.
- Designed Smoke Test Cases & Functional Test Cases for **PWA and Web App**.
- Conducted **Smoke tests, UI tests, Functional tests** along with **regression tests** and **compatibility checks**.
- Testing service side functionalities via **POSTMAN, Swagger UI**.
- Writing **Selenium scripts** for automating Web and Mobile Applications along with **Appium**
- Responsible for multiple rounds/iterations of Test Case execution.
- Active bug reporting and follow ups until its fixed.
- Use of **JIRA** to log and track bugs and defects.

EDUCATION:

Bachelor's Degree in Computer Engineering

Pune University 2011 - 2015 | 65%

CERTIFICATIONS / TRAINING PROGRAMS:

- Diploma in software testing from TechRel Institute, Pune.
- Participated in Seed Infotech Software testing workshop in Pune.

EXTRA CURRICULARS:

- Active blood donor for Ruby Hall clinic and conducted area level blood donation camps in association with Akshay Blood Bank.
- Conducted Rezoomex Techathon event.
