SUMMARY

- 4.5 + Years of diverse experience in Quality Assurance **Automation/ Manual** testing.
- Expertise in automating web application using java **Selenium** web driver.
- Experience testing Cloud applications.
- Hands on experience in Performance testing using **Jmeter**.
- Hands on experience in API testing using **SOUPUI** tool.
- Experience working on version control Git, GitLab .
- Experience working on CI/CD tool Jenkins.
- Knowledge of **Groovy, Auto It** and **Sikuli** testing tool.
- Experience working on 3rd party reporting tool (**Extent Report**).
- Knowledge in various automation frameworks like data driven and hybrid framework.
- Knowledge of **Test link** test management tool.
- Experience in executing SQL queries in order to view successful transactions of data and for validating data.
- Experience in working agile methodology.
- Experience in working at client locations.

EXPERIENCE

Company name: ESDS software solutions (P) ltd

Product name: eNlight Cloud 360° Duration: **2018 till Date**

Description : eNlight 360° cloud solution comes with a full blown hybrid cloud orchestration(arrangement or planning) layer along with complete Datacenter Management Suite i.e. eMagic (DCIM) and Security Scanner (MTvScan) with the patented auto-vertical scaling technology US (Patent No US 9176788) and UK (Patent No. : GB2493812) of CPU, RAM, Bandwidth and any such resources, eNlight 360° ensures the efficient utilization of IT Infrastructure.

Responsibilities:

1. Develop data driven framework using POM
2. Create automation scripts for VM(Virtual Machine) life cycle (Add,delete,stop,restart,start,snapshot,disk,VIF(Virtual Interface),Activity logs)
3. Using 3rd party reporting tool (Extent Report) created customize reporting for framework and SOUP UI
4. Create Jmeter scripts for VM (Virtual Machine) creation, deletion, template deletion and creation.
5. Test rest API's of different modules using SOUP UI

Company Name: Datamatics Global Services Ltd

Project Name: Delarue Identify Application (BDD Testing) Duration: **2017-18**

Description: De La Rue plc is a banknote manufacturer, security printing of passports and tax stamps, brand authentication and paper making company with headquarters in Basingstoke, Hampshire, England

Responsibilities:

1. Gathering the requirements.
2. Writing Behavior-driven development (BDD) test cases.
3. Writing automation scripts for BDD test cases.

Project Name: GoHealth Application policy creation (Performance Testing) Duration: **2017-17**

Description: CignaTTK Health Insurance Company Limited is a joint venture between the U.S. based global health services leader, Cigna Corporation and Indian conglomerate, TTK Group.

Responsibilities:

1. Gathered the requirements and compiled them into Test Plan
2. Designed test cases and performed load testing for Cigna ttk (India) Go Health Application policy creation module for 2000 virtual users and transaction processes.
3. Performed Load Test, prepared Test Data, Execute test, validate results, Manage defects, Regression and report results
4. Interface with developers, project managers, and management in the development, execution and reporting of test automation results
5. Identify and eliminate performance bottlenecks during the SDLC
6. Independently develop Jmeter test scripts according to test specifications/ requirements.
7. Added performance measurements for Windows application server, Sql server in JMeter controller and monitored online transaction response times, Web hits, TCP IP Connections, Throughput, CPU, Memory, Heap sizes, various Http requests etc.

Project Name: iRAT (Intelligence Robotics Automation Tool), Mumbai Development, Automation Testing) Duration: **2016-16**

Description: iRAT is a Web based application for Dartenum. Dartenum is a high productivity automated web-testing solution based on the Open Source Technology –Selenium. It captures scripts, data and executes it to produce test reports.

Responsibilities:

1. Developed module as per the framework.
2. Responsible for driving End to End Test scenarios efforts and in identifying test data for testing purpose.
3. Writtern automation script for application.
4. Unit testing of the application
5. Executed SQL queries for verifying results.

Project Name: Visas of The World (VoTW), Automation Testing, Maintenance Duration: **2016-16**

Description: Visas of The World (VoTW), began as an idea to create database of global visa related information and become a one-stop shop for information across all countries and geographies and for all nationalities. And ultimately become the single source of information for visa and travel related information. Currently, VoTW offers information on Visa documentation, Application process, Visa Forms, Fees, Document, required, Embassy's Details, and Customs Regulations for all 237countries.

Responsibilities:

1. Writing automation scripts for web pages.
2. Worked on data driven framework which is used to capture the data and find the difference from source and destination sites.
3. Actively involved in running utilities on sites.
4. Logging defects in the Issue management log and communicating the same with the development team.
5. Re-testing of the defects.
