PROFILE

Myself Hemant Nagori, I have completed B. E. Computer Engineering from Pune University. To speak something about me, I am pretty good at HTML, CSS, JavaScript, PHP, WordPress and know about Photoshop, Version control system, SEO. App development and web development are the fields of my interest, and currently, I am working in company name **crafting genius** which is web development and Internet marketing company based in Bengaluru. When I'm not working or studying, I usually spend some time with either some business magazines or Slack Communities.

HEMANT NAGORI

Web Developer

PROJECTS

WEBSITE DEVELOPMENT

Website development process involved in multiple phases from research to code and deployment. I have developed around 16-18 static websites from PSD to Responsive Pages. Worked with senior backend developer for adding functionalities like contact form submission and to building and working with API's. Website developed with languages like HTML, CSS, JavaScript, jQuery and PHP. And Worked on Frameworks like Codeigniter and Laravel on basic level. Worked on deployment and maintenance tools like cPanel and Version control system like Git.

WORDPRESS AND WOOCOMMERCE DEVELOPMENT

As we know building a CMS is not easy but working with is quite easy if you have talent and experience to handle complex technologies. I have worked on open source popular CMS WordPress and built around 6-7 website and E-commerce platform. Worked on several domain like blog management, hotel management sites for online booking, interior decorators, clubs and event management sites to sell event tickets, Company portfolio and many more.

DIGITAL MARKETING

Not only development as a developer I should be responsible for how the website is performing and selling product and services. I have worked with marketing technologies like Search Engine Optimization (SEO), Google Analytics and Search Console and helped in passing a better judgement about how website is performing and how can we make it better to stand in competition.

PRODUCT RESEARCH AND USER JOURNEY CREATION

I am not only good with technologies but kind of good with making idea into product. I have designed user journey of almost 3 working and under development product. I have worked with client to make their idea into viable product.
