Resume Objective:

I wish to work as a BI Lead / Business Analyst in a well-established organization and contribute to the growth of organization using my experience and skills in the industry. My domain expertise and negotiation skills would be helpful in tapping the key insights to meet the objectives of the company.

Professional Experience

Seasoned BI professional focused on tapping the insights and important KPI'S to improve business performance. 3+ years of experience in BI and IOT, covering creation of Data visualization, Analytics and Reports, Designing BI solutions for Blue Chip companies across various business functions likes Sales, Finance and Supply Chain in domains like FMCG, Retail, Manufacturing, Pharmaceutical and Banking. Proficient in data integration and working on various ETL and BI technologies.

- Interact with Key Business Users to identify their business needs and to provide them with more robust and optimized solution, develop the architecture of module and creation of prioritized reports and dashboards.
- Integrate data from multiple sources like SAP, Oracle, Teradata, Flat files and other cloud-based data warehousing solutions.
- Analyze functional requirements, prepare a Blueprint of the solution and thereafter create a Data model in Qlik to support reporting and analytics.
- Build Reports and Analytics using Qlik offerings (QlikView / Sense) around the data to visualize the business KPIs more effectively.
- Create static reports using Qlik NPrinting to be circulated via e-mailers or portal / folder distribution as per the requirement.
- Performance tuning of different mappings for the best outcome.
- Optimize existing applications and infrastructure.
- Conversion of QlikView dashboards to QlikSense.
- Qlik server maintenance / upgrade and server clustering.
- Building and maintaining healthy business relations with business users, ensuring high satisfaction matrices by achieving delivery & service quality norm.
- Engage vendors for resourcing and Qlik projects.
- Promote BI, increase adoption rate and create evangelist within organization
- Conduct Online and Classroom trainings for end users.
