| • Accenture | April-2019 to July -2020 |

Key Projects Undertaken

Project # 1	Apr'19 to July'20
Project Title	: YADA
Tools	: Sabre, SoapUI , Rally
Role	: Senior Software Test Engineer

Description: YADA is a Flight ticket checking mobile application automation project. Here we automate some modules like ATO, Gate, EGR and Other Function. By using this app we can do check-in, Generate Boarding Pass and Bag Tag, Board the passenger and Un-Board.

Roles and responsibilities:

- Reviewed Business requirements, IT Design documents and prepared Test Plans which involved various Test Cases for all assigned module/projects; Review Test Requirements, Creating Test Plans and Test Strategy documents.
- Prepared Test scenarios, Test cases and executed the same.
- Developed several re-usable functions to handle common functionalities.
- Used Rally to store all testing results, metrics, created Test Cases, and Reporting.
- Developed a Defects Tracking Log for the SharePoint Site to track defects while testing.
- Interacted closely with developers regarding defects, participated in tracking, reviewing and analyzing bugs.
- Extensively performed Manual Testing process to ensure the quality of the software.

Key Projects Undertaken

Project # 2

Dec'16 to Mar'19

Project Title : Connect Me

Tools : HP-ALM, Swagger

Role : Tester

Description: **Connect Me** is a web application used by Airport employees for internal communication purpose. The automation framework of this application is built using Selenium tool with Java platform. The data used in application is created using the tool Swagger that runs the web services.

Roles and responsibilities:

- Participated in **Requirement Specification Meetings** to understand the application's functional requirements to initialize the test scenarios and test flows
- Identification of test data for performing Integration Testing.
- Created test scenarios, test conditions and expected results and testcases.
- Analyzed the Defects and raised it in HP-ALM to get better build for the end Users.
- Managing knowledge sharing to the team after identifying critical bug.
- Client Interaction for K.T Sessions and Reverse K.T Sessions and BA activities.
- Assigning and tracking of work to the team members.
- Involved in preparing daily status report and Weekly status execution tracker.
- Handling daily status calls between onshore and offshore and pro-actively.
- Reviewed and consolidated **daily status reports** of every tester in absence of the lead.
- Worked with the onshore team for **maintenance** of the test.

Other Activities

- Organizing team outings and team events.
- Maintaining details of my team for Security Audits.
- Maintaining DE Matrix Reports for all projects in my team.
- Maintaining Leave Planner for the team to make work well organized.

Education

BE From Anna University, Chennai in 2016
