Giving code walk through to the new joiners.

Handling exceptions and performing RCA in the project.

Certification Course –

Completed software testing course from **Testing Campus**   **Duration: 6 months**
Work Experience of project - 4 months

Got trained on following technologies –
  Manual Testing
  Automation Testing (Selenium 2 with core java, telerik test studio) for -
    Android
    Web
    SQL
    Agile

Education Details –

Completed **Bachelor of Engineering** from Sinhgad **Academy of Engineering, University of pune** with 65% aggregate.
Year of Passing: 2015

Project Details –

Organization   : Testing Campus InfoTech, Pune

Project Name   : DemoCRM

Technology   : Php, Ajax, MySQL, Tomcat etc.

Architecture   : MVC

Type Team Size   : 6

Process Type   : Agile scrum process

Duration   : 4 months

Description –

It is a web based application designed and developed to perform marketing in an efficient manner. It helps to manage and maintain leads, billing of the customer, performing email campaigns and measuring its efficiency, generating reports to analyze sales forecast.

Organization   : **Sofsyst Software and system private limited, Nashik**

Project Name   : Mobile Rving website, MRV APP, MRV BUZZ, MRV Connect

Technology   : .PHP, Angular JS, PHP Database etc.

Work   : **Software tester**

Description – (www.mobilerving.com)

It is a Web application designed and developed to perform different resorts and quality properties reservations for particular country, it managed for more than thousands resorts in an efficient manner. It helps to manage and maintain transactions and detailed billing of the customer.

Organization   : **Sofsyst Software and system private limited, Nashik**

Project Name   : Unique Education and Social Organization

Technology   : CSS HTML C# etc.

Work   : **Software tester**

Description – (www.uniqueworld.org.in)

It is a Web applications designed and developed to student exam registration and performs different Exams for students and make results dashboards for students.

Organization   : **Sofsyst Software and system private limited, Nashik**

Project Name   : JAR Distribution

Technology   : Android App

Work   : **Software tester**

Description –
It is Android Application designed and developed to distribute water jars to the different location by using map tracking and maintains records in app and also makes transactions to the reliable services

Roles and Responsibilities –
Write/review/execute test cases

Performing functional testing, integration testing, system testing. Performing exploratory testing

Writing test plan

Reporting defect using defect tracking tool Preparing traceability matrix

Developing hybrid frame work using selenium 2

Integrating frame work with ANT to generate html based reports Developing build.xml to configure ANT

Integrating Junit for executing the test in selenium

Developed properties file to store xpaths of the object Reading data from excel files by using POI API

Developing bat files for executing the test

Matching the execution speed of selenium with the application using implicitly

wait statements

Understanding requirement and then identifying scenarios Preparing and updating STCM

Attending daily standup meetings

Validating data in the back end data base using SQL Giving KT to new joiners

    I hereby declare that the above written particulars are true to the best of my knowledge and brief.

                                                                    Pooja Dilip Desai
