🎯 CAREER OBJECTIVE:

I seek a job as an Automation Test Engineer where I can use my knowledge of Automation Testing in various Automation Tools. I wish to contribute towards organizational goals through my technical and analytical skills, hard work and creativity.

🚶 WORK EXPERIENCE:

Company: Infosys Limited

Duration: September, 2015 – Present

Job Role: Senior Testing Executive (Automation Tester)

Project Work:

- I Worked in Automation Testing Project of Branch Migration of a renowned Banking client. Client wants to migrate from WinXP to Win10 and all the applications need to be tested. I worked in creating the automation framework in UFT and created automation script for all the test cases. I was also involved in Test Data setup and execution too.
- Created Automation framework on Selenium for web applications. Integrated TestNG and Maven framework.
- Created Mobile Automation Testing framework using Selenium, Appium and Perfecto Mobile. The framework I developed support both IOS and Android platform.
- Developed Behavior Driven Automation Framework for Web Application using Selenium and Cucumber.
- Worked on Continuous Integration using Jenkins and Github.
- Developed tools like ScreenCapture, PerformanceAnalyzer in C#. These tools are being used in several projects now.

Achievements:

- Best Debutante
- Best Team
- Excellence Award
- Because of my technical strength in Automation field I was selected as a member of Core Automation group to provide Automation solution to different projects

Trainings:

- Mobile Automation using Perfecto Mobile
- Basics of Continuous Integration and Continuous Development

ACADEMICS:

Degree	Board/University	School/College	Year of Passing	Percentage
B.Sc. (Computer Science)	West Bengal State University	Brainware College of Professional Studies	2015	86
